

“Alternative Design #7” – DES 1801749

Zero Offset - Carroll Rd/Mossy Oak Run intersection

Eastbound traffic on Carroll Rd: one lane from the State Rd 3 stoplight. That single lane fans out to allow traffic to turn left into Mossy Oak (north to Walgreens) or continue eastbound and either go straight or turn right (south into CVS).

Westbound traffic on Carroll Rd: heading towards the State Rd 3 stoplight. From Shearwater, there should be a single lane of traffic that fans out to a left turn lane into Mossy Oak (south into CVS) or continue westbound and either go straight or turn right (north into Walgreens). Once traffic is west of the Mossy Oak intersection, westbound traffic will have the option of turning left, continuing straight on Carroll Rd or turning right onto northbound State Rd 3.
